

Scheme of work

For each VTCT (ITEC) qualification, the lecturer/centre must complete a scheme of work for each unit indicating how the Lecturer is planning to cover the unit content throughout the course. Set out the planned sessions in terms of learning outcomes to be achieved. These should match those stated within the VTCT (ITEC) unit specification. Include all units of each course offered. Hours should meet the minimum guided learning hours listed within the unit specification.

Unit title: iUBT321 – Apply individual permanent lashes

Total contact tuition hours proposed: 38

Lecturer(s) responsible:

Learning objectives	Lecture content	Suggested resources	Approx. hours
Introductory session	<ul style="list-style-type: none"> College rules and regulations College mission statement VTCT (ITEC) rules and regulations Health & safety Timetable Dates – holidays etc. Syllabus Recommended books Uniform 	<ul style="list-style-type: none"> Lecture Q&A Using all the documents listed to ensure the students understand the college expectations and their commitment to the course 	
1. Be able to prepare for an individual permanent lash treatment			
Prepare themselves, client and work area for individual permanent lash extension treatment	<ul style="list-style-type: none"> Preparation of working area Equipment Products Work wear Personal appearance and behaviour Hygiene e.g. sterilising/sanitising tools and equipment Procedures used to prepare client for treatment Client care and modesty 	<ul style="list-style-type: none"> OHP/Whiteboard Lecture Q&A Homework Test An example of a consultation form can be 	10

Use suitable consultation techniques to identify treatment objective	<ul style="list-style-type: none"> • Consulting in a suitable area • Positive body language • Positioning of the client • Good communication skills (asking open and/or closed questions where appropriate) • Professionalism • Contra-indications and contra-actions • Treatment plan • Products used • Consent • Confidentiality • Client's signature 	downloaded from www.itecworld.co.uk		
Interpret and accurately record the results of tests carried out prior to treatments	<ul style="list-style-type: none"> • Type of tests conducted • Date and time when patch tests were conducted (must be 24–48 hours prior to treatment) • Manufacturers' recommendations • Products used • Area where tests conducted • Skin reaction: positive or negative • Disclaimer form • Client's signature on disclaimer form • Photographs are taken of the client's natural lashes prior to treatment • Photographs taken prior to treatment are kept with records for future reference and to evaluate the effectiveness of treatment 			
Provide clear recommendations to the client	<ul style="list-style-type: none"> • The outcome of the consultation, identification of facial characteristics, natural eyelash analysis and relevant tests • Occupation • Lifestyle • Current regime • Recommendations for ongoing or further maintenance treatments and the level of commitment required 			
Select products, tools and equipment to suit client treatment needs	<ul style="list-style-type: none"> • Couch or chair • Trolley • Stool • Towels • Blanket • Additional support if appropriate • Headband • Bedroll 			

	<ul style="list-style-type: none"> • Robe • Disposable slippers • Disinfecting fluid • Magnifying lamp • Tissues • Cotton wool • Sponges • Gloves • Spatulas • Bowls • Mirror • Sterilising solution • UV cabinet • Autoclave • Hot bead steriliser • Chemical immersion equipment • Waste disposal • Personal protective equipment • Eyelash comb • Micro brushes • Disposable eyelash combs • Tweezers • Disposable face mask • Disposable head cap • Products for the following treatment: <ul style="list-style-type: none"> - Application of individual permanent lashes 		
Describe salon requirements for preparing themselves, the client and work area	<ul style="list-style-type: none"> • Any particular rights, restrictions and acts applicable to permanent eyelash treatment • Code of practice/ethics • Insurance and professional association membership • Record keeping • Professional appearance 		
Describe the environmental conditions suitable for individual permanent lash extension treatments	<ul style="list-style-type: none"> • Lighting • Heating • Ventilation • Noise levels • Available space • Music • General hygiene 		

	<ul style="list-style-type: none"> • Waste disposal • Décor • Equipment • Privacy • Reception areas • General use/treatment areas 		
Describe the different consultation techniques used to identify treatment objectives	<ul style="list-style-type: none"> • Positive body language • Positioning of the client (no barriers between themselves and client) • Good communication skills (asking open and/or closed questions where appropriate) • Verbal and non-verbal communication 		
Describe the types of tests that are carried out before providing lash extension treatments	<ul style="list-style-type: none"> • Skin sensitivity test • Patch testing for all products to be conducted a minimum of 24-48 hours prior to treatment • Manufacturers' instructions • Assessment of eye size and shape • Inspection of lashes to be treated • Identifying client's natural lash length and condition 		
Explain the importance of carrying out tests prior to the treatment and accurately recording the results	<ul style="list-style-type: none"> • Type of tests conducted • Date and time when patch test was conducted (must be 24–48 hours prior to treatment) • Manufacturers' recommendations • Products used • Area where test conducted • Skin reaction: positive or negative • Disclaimer form • Client's consent and signature on disclaimer form • Adhere to code of practice • Establish treatment suitability • Establish possible contra-actions • Establishing clients desires are realistic in terms of treatment available • Identification of length and condition of natural lashes • Rationale behind selection of lashes • Evidence of clients natural lashes prior to treatment 		
Explain the contraindications that prevent or restrict individual permanent lash extension treatments	<ul style="list-style-type: none"> • Contra-indications requiring medical permission – in circumstances where medical permission cannot be obtained clients must sign an informed consent form stating that the treatment and its effects have been fully explained to them and confirm that they are willing to proceed without permission from their GP <ul style="list-style-type: none"> - Medical oedema - Nervous/psychotic conditions 		

	<ul style="list-style-type: none"> - Epilepsy - Recent facial surgery affecting the area - Diabetes - Skin cancer - Slipped disc - Undiagnosed pain - When taking prescribed medication - Whiplash • Contra-indications that restrict treatment <ul style="list-style-type: none"> - Fever - Contagious or infectious diseases - Under the influence of recreational drugs or alcohol - Diarrhoea and vomiting - Any known allergies - Eczema - Undiagnosed lumps and bumps - Localised swelling - Inflammation - Cuts - Bruises - Abrasions - Scar tissue (2 years for major operations and 6 months for a small scar) - Sunburn - Hormonal implants - Urticaria - Recent fractures (minimum 3 months) - Sinusitis - Neuralgia - Migraine/headache - Hypersensitive skin - Chemotherapy - Botox/dermal fillers (1 week following treatment) - Hyperkeratosis - Skin allergies - Allergies to perming products, adhesives and solvents - Trapped/pinched nerve affecting the treatment area - Inflamed nerve • If there has been any reaction to the patch test, treatment will be contra-indicated • Any eye surgery (approximately 6 months) • Conjunctivitis • Hordeolum/styes • Hay fever
